

# Dots - paint creatively with dots

11. Once you have learned these basic steps, you should continue with the exercise book to get better. Practice the DOTS with the different stamp sizes and colors. Now place the stamp on the first gray circle to fill in the color you have chosen. If you have mastered these exercises, then you are fit to enjoy the theme book.
12. We recommend that the page you want to work on be taken out of the book, so colors don't bleed on to other pages below. This is very easy because all sides are perforated. It's much easier to work with a single sheet than with the whole book.
13. In all templates, there are pre-drawn light gray DOTS (circles) with a diameter of 10, 14 or 18 mm. You have to fill these DOTS with the colors of your choice to complete the pre-drawn figure to your liking.
14. If you are a little practiced, you can try the so-called shades. The first point you print is the darkest. If you continue to work with the same stamp without taking in any new color, each additional dot will be lighter and lighter than the previous one. You can then put on the first darker point more points that are lighter.
15. You can use the DOT painting style to create pictures without templates. For example, you can cut an animal's head off a picture or magazine, stick it on paper, and then design the body with the help of DOTS. Or vice versa ... create a square of DOTS and paint a house with a pencil or with crayons or with the brush supplied ... or create a circle with DOTS and paint a flower ... the imagination knows no boundaries.
16. The supplied brush allows you to complete or modify images with a normal painting technique. For example, to shape the contours of the pictures.
17. We are going to take paintings of young artists like yourself and publish them on our website. Feel free to email us a picture of your painting to join us.
18. Of course you may hang your painting to the walls of your room.  
You can give your paintings as a gift to your parents, grand parents, friends, siblings....
